

Private Sector Platform

A monthly highlight of companies' innovative initiatives in plastic waste reduction.

Company Highlight

SUSTAINABLESG

SustainableSG has been a prominent sustainability consultancy based in Singapore. Founded in 2018, the company is dedicated to integrating sustainability principles into corporate strategies, fostering environmental responsibility, resilience, and prosperity.

The organization offers comprehensive services encompassing strategy development, risk assessment, capability building, sustainability reporting, stakeholder engagement, and public education initiatives.

Identifying a pressing issue concerning single-use LDPE bags and packaging, SustainableSG initiated a closed-loop concept in collaboration with Chen Ho Plastic Pte Ltd, a plastic bag manufacturer headquartered in Singapore. This innovative approach involves collecting used plastics from clients, reprocessing them into resin, and remanufacturing them into reusable plastic bags or packaging.

Furthermore, the clients buy back the recycled bags. By having oversight of the plastic use, sale and recycling loop, the company reduces environmental pollution caused by single-use plastics and supports localised recycling initiatives.

Through collaborative efforts, SustainableSG empowers organizations to enhance business efficiency, resource management, carbon footprint reduction, and circular economy practices. Additionally, the company provides customized training sessions to equip senior management and managers with the skills needed to implement sustainable initiatives effectively. They also assist clients in preparing sustainability reports in line with global standards and engage stakeholders through various activities.

Committed to fostering a more sustainable future, SustainableSG is a volunteer with The Matcha Initiative (<https://www.thematchainitiative.com/>), a non-profit platform that promotes corporate sustainability in Singapore and the regional countries. SustainableSG also runs a Facebook page (<https://www.facebook.com/SustainableSG>) to promote public awareness of global sustainability issues.

About Private Sector Platform

The Private Sector Platform promotes good practices and innovative actions taken by private sector actors in the ASEAN+3 region. Businesses can utilise the PSP to showcase the products, services and technologies that are helping reduce plastic waste.

Many companies – big and small – are growing concerned about the future of our planet. The sight of plastic waste scattered across beautiful landscapes, oceans and beaches has motivated many to take affirmative action. These innovations cover everything from plastic usage reductions and alternative materials, to recycling and waste management – to name just a few. Our platform offers a way to honour, highlight and promote these efforts.
